NANO VIBRONIX®
Therapeutic Waves in Motion

WEARABLE THERAPEUTIC ULTRASOUND

Targeted therapeutic ultrasound that uniquely generates and delivers localized, low frequency, low intensity therapeutic ultrasound waves through a self-adhering patch, placed on or next to the treated area.

PainShield helps treat the following conditions:

Chronic and acute pain • Neck and back pain • Knee, elbow, shoulder and other joint pain • Tendon and muscle pain • Sport related injuries • Arthritis and tendon inflammation • Rheumatic pain • Pelvic pain - Pudendal Neuralgia, Abdominal Adhesions, Endometriosis, Interstitial Cystitis • Plantar fasciitis • Tennis elbow • Achilles tendonitis • Carpal tunnel syndrome

PainShield therapy is available and effective when you need it.
Safe to use, simple one button operation, rechargeable and portable,
Self-adhering ultrasound transducer in a patch for hands free therapy:
Use it day or night, on the move or when you sleep.
