ANTI-OXIDANT & EMOLLIENT
(Squalane)

- Soften and flatten raised scars
- Lighten scars
- Relieves itchiness and discomfort
- Non-oily, non-sticky, quick drying and odourless
- Safe for all skin types

Abbreviated Prescribing Information

RejûvaSil® Silicone Scar Gel is clinically formulated to soften and flatten raised scarring. The clear and odorless silicone gel formula dries fast and forms a water-resistant barrier on the scar. This creates a hydrated occluded environment which decreases capillary activity by reducing fibroblast-induced collagen deposition and scar hypertrophy, decreases hyperemia, minimizes fibroblast production of collagen, and promotes wound flattening. RejûvaSil® Silicone Scar Gel may be used in conjunction with other scar treatment modalities, to help in the prevention of the formation of hypertrophic and keloidal scars.

Active Ingredients
Liquid Silicone (97%), Vitamin C, Emu Oil and Squalane

Method of Application
Apply the gel to clean and dry scars, and massage gently. Use 2 - 3 times daily. The shortest recommended application in 30 days, large areas or older scars may require more time.

Storage Condition
Store below 27°C or 80.6°F

Shelf Life
36 months from manufacturing date

Contra-Indications
It cannot be used for open wounds. It can only be used externally. Avoid contact with eyes and mucosa. If discomfort or rash occurs, discontinue use and consult the doctor. Keep out of reach of children. Child usage should always be under adult supervision. If any side effect occurs, please consult your pharmacist or physician immediately.
