

Your Comfort, Our Priority

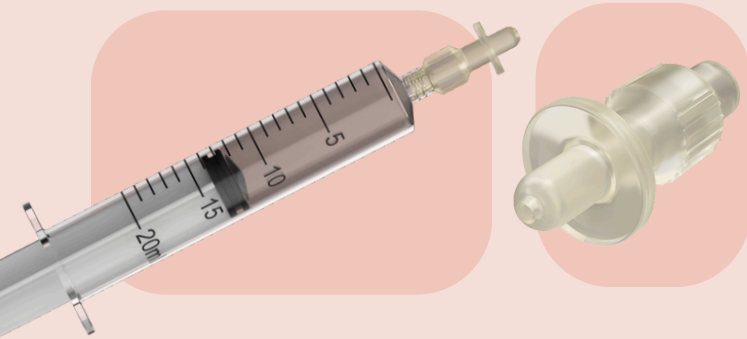

A Gentle Approach to Bladder Health

The UroDapter is a catheter-free device for comfortable, easy bladder treatments. Suitable for both men and women, it provides a compassionate alternative to traditional catheters.

Indications for UroDapter Use

- Interstitial Cystitis / Bladder Pain Syndrome
- Recurrent Urinary Tract Infections
- Post-irradiation cystitis
- Post-chemotherapy cystitis
- And even more - making it a versatile tool in the management of your bladder health.

Why UroDapter?

Universally Designed:

Thoughtful design for both male and female patients, ensuring a comfortable treatment experience for all.

Minimized Discomfort:

By eliminating the need for catheters, the UroDapter significantly reduces the discomfort typically associated with bladder treatments.

Self-Treatment at Home

Particularly for male patients, the UroDapter facilitates self-treatment at home, promoting independence and confidence in managing your health.

A Better Alternative to Catheters

Choosing the UroDapter means enjoying numerous benefits over traditional catheter use, including:

Reduced Risk of Infections	Significantly Less Bleeding
Enhanced Comfort	Greater Autonomy
No Urethral Injury or Strictures	Simultaneous Treatment of Bladder and Urethra

Your Next Steps

Consult Your Healthcare Provider: For more details and to find out how the UroDapter can be integrated into your treatment plan, consult with your healthcare provider.
